EARTHQUAKE SOUND

Earthquake (Wireless) Sound

SWAT 2.4 consists of a Transmitter (a unit that connects to the source) and a Receiver (a unit that connects to the amplifier or powered speaker). The SWAT 2.4 Transmitter connects to a stereo, MP3 player, computer, or any other device that can play audio through a 3.5mm stereo jack or RCA output. The Receiver is then connected to an amplifier or a powered speaker through an RCA input. Multiple Receivers can connect wirelessly to one Transmitter if you want the music to play in different areas or on multiple systems. Extra Receivers can be purchased separately.

Applications

- Audio transmission in a large room (DJ)
- Outdoor speakers (BBQ, Patio, Pool)

- Wireless audio transmission for surveillance
- Paging System
- Wireless microphones or loudspeakers
- iPod, sound card, CD, DVD, MP3, smart phones players or other musicplayers
- Wireless headphones
- Ambient music (in setting of offices, hospitals, waiting rooms)

DVDO Air^3 WirelessHD® Adapter

The Air^3 is the first wirelessHD® adapter delivering HD content, not only from HDMI sources, but also from MHL-enabled smartphones and tablets to a big screen.

60GHz Wireless Technology for Gaming

Using 60GHz wireless technology, the Air^3 transmits HD content up to 10 meters in-room without any interference from Wi-Fi, and features RF beam forming, auto input sensing, auto standby, near-zero latency, and auto rate negotiation to deliver a cable-like reliability and performance.

All wireless A/V systems are not created equal. 5GHz-based systems sacrifice picture quality by compressing the signal to fit within the limited bandwidth. It is

susceptible to interference from cordless phones, Wi-Fi and even microwave ovens. Air^3 avoids these problems by using the 60GHz frequency band and transmitting data up to 4Gb/s.

From . . .

e² EYES | EARS LIGHT® Speaker

LightSpeaker runs on proprietary 2.4GHz wireless technology to prevent interference from your wireless network in routing audio to a couple of different areas - out of lights and rocks. It lets you transmit music to multiple rooms from a separate base unit to which you can connect two sources. The LightSpeaker system combines audio with an LED bulb, with up to 16 LightSpeakers able to be daisy-chained. The stereo, weatherproof AudioRock system lets you take the tunes outside without running wires.

CHANNEL VISION™

100W Wireless In Wall Amplifier

Channel Vision's Point to Point 100W Class D Amplified Wireless Audio Receiver is designed to work with Channel Vision's Point to Point Receiver – WA-320 to create whole house distributed audio systems without the need for running wires from one room to another. The integrated 100 Watt amplifier is ideal for powering distributed audio speakers as well as wireless home theater applications.

Wireless IP Camera

1.3 Megapixel Wireless IP Bullet
• H.264 compression delivers full resolution
• IP66 Waterproof Protection
• WIFI 802.11 n, b, g and wired connection
• iOS® and Android® Monitoring
CHANNEL VISION™

Channel Vision's 6544 1.3MP Wireless Bullet IP Camera offers superior image quality with a 1.3 megapixel CMOS sensor and has the ability to capture images up to 1280 x 800. Designed for professional video surveillance, the 6544 offers a high-performance wireless transmission with a wide coverage range according to the IEEE 802.11n standard, as well as compatibility with IEEE 802.11 g and b.

ADVANCED AUTOMATION SOLUTIONS

IrrigationCaddy

9 Zone WIFI Sprinkler Controller

The Irrigation Caddy is an ethernet based irrigation control system. The system allows the user to control and schedule an irrigation system from any computer with a web browser, Android or iOS.

Fusion Research Ovation Wireless

Fusion Research announced its Squeezebox-based Ovation Music Streamers last year, and the company recently added wireless with the new Ovation Wireless Player (OWP). With the new OWPs, the Ovation servers can serve up to 16 wireless zones of stored music and popular streaming services. The players use Wi-Fi and sit on a standard home network. It works with a wide array of off-the-shelf two-way drivers and mobile applications.

High Power Wireless Access Point

These Access Points have high powered radios allowing you to cover a large home with only one access point.

Mounting the WDAP-C7400 (above) to the wall or ceiling is simple with its included bracket.

The WNAP-6350 AP (below) is IP67 Outdoor weather proof rated so its excellent for use outdoors in the elements as well as indoors.

When ordering you can select Directional or OmniDirectional antennas giving you the ability to spec the right AP for your specific project.

We recommend OmniDirectional antennas when placing the AP in the middle of the home and Directional when placing the AP at the end of a home or when you want to get greater signal coverage on an L shaped home.

2MP Planet Wireless IP Camera

This small foot print this camera can be installed almost anywhere without drawing too much attention to itself. Wireless N allow installation just about anywhere, streaming HD Video. The camera features bright white leds that are visible to the eye, allowing it to see in low light situations. A built in PIR sensor gives you accurate motion detection. Using a 3rd party app IP Cam Pro you can listen in and talk with the cameras built in mic and speaker from your cell phone.

Axxess Zigbee Wireless Doorbell

The Axxess Wireless Doorbell Button is beautifully designed to welcome guests at your door. A press of the button wirelessly activates our chime relay or other configured devices.

Axxess Wireless Motion Sensor

The Axxess Wireless Motion Sensor supports all motion dependent functions, including lighting, security, occupancy detection and energy management. Upon detecting people moving in a space, it communicates that event wirelessly on a programmed schedule. It also measures temperature and light level. Utilizing a ball mount, the Wireless Motion Sensor is able to be adjusted to whatever direction you wish and enables quick removal.

Axxess Zigbee Contact Sensor

The Axxess Wireless Contact Sensor transmits information on wether a door or window is open or closed. Using a magnetic switch the device will transmit an Open or Closed signal.

Axxess Zigbee Repeater

The Axxess Zigbee Repeater / Contact Sensor is a flexible tool to build a Control4 system more effectively. It combines the capabilities of a zigbee repeater with 3 contact inputs and a temperature sensor.

SafePlug
Fire, Shock & Power Protection!

SafePlug Zigbee Outlet

The SafePlug 1203 Zigbee outlet is designed and built to run on a Control4 system. The outlet brings on a new form factor allowing you to remove the trim plate from the existing outlet and screw this unit securely to the wall socket giving you a snug clean look.

FACTOR
ELECTRONICS
Ideas In Action

Factor Wireless Conference Mics

Quad conference UHF wireless microphone system 32 Individually selectable UHF channels per microphone. Four distinct frequency bands eliminates mic to mic interference. Four professional microphones with LCD status displays. Excellent feedback rejection Cardioid pickup pattern. Integrated on/off, volume & high/low power modes. 3 Pin gold plated balanced XLR outputs as well as 1/4" unbalanced mixed output receiver with all metal construction and large LCD displays.

Presenter-One Wireless PA

Truly wireless battery (or AC) powered PA system. Easy to operate and transport "all-in-one" audio system. High

quality aluminum chassis with built-in handle and wheels.

120 watt RMS high efficiency digital amplifier and a 10”- 3 way full frequency coaxial speaker. Built-in mixer with MIC & Line inputs + EQ. Switchable automatic microphone override.

Non-memory rechargeable batteries featuring an operating time of 5-6 hrs with music, 10 + hrs speech! Charging time approx 6 hours and also operates on AC. Integrated pole stand mount 1 3/8”

Bluetooth Compact Digital Amp

Ultra high efficiency amplifier (95%) compact digital stereo amplifier. Automatic power reduction with no input signal.

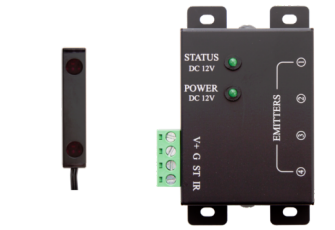
Stereo, dual mono and bridge modes with on-board Bluetooth receiver/player (A2DP) along with unbalanced microphone/line input, stereo line input dual RCA jacks and a stereo line input 3.5mm jack.

Line output with volume control, bass and treble controls. Complete IR & RS232 control, includes IR receiver & remote control.

Convection cooled, anti-static steel chassis. 24Vdc operation and includes power supply. 3 year warranty

Infrared Kits & Accessories

Complete IR Kit Plasma, CFL and



Sunlight friendly dual frequency 36/56K micro IR repeater connection block, two dual emitter flashers & power supply included.
